Can a lady have too many purses? I don't think so and this little/big purse is just what you need for those essentials you have to take with you whenever you go to the grocery store, shopping or even the beach. The strap goes over your shoulder for hands free access to everything you need. The back pocket is just the right size for your cell phone enabling quick answering of those important calls.

**We can only take 15 in the class so sign up soon!**
